

 The logo for Xact features the word "xact" in a bold, white, lowercase sans-serif font, set against a dark red rectangular background. To the right of the text is a stylized graphic element consisting of several parallel, curved lines that form a shape resembling a double-headed arrow or a stylized 'X'.
 xact

Xact

Description

Xact is specifically designed to manage short-term scheduling functions within the mining industry. Based on proven XPAC technology, it can also add value in a range of project management and industrial applications.

Application

Xact may either be used in conjunction with XPAC or as a stand-alone package.

Designed as a short-term scheduling tool kit, Xact provides a central repository for short-term scheduling data and logic.

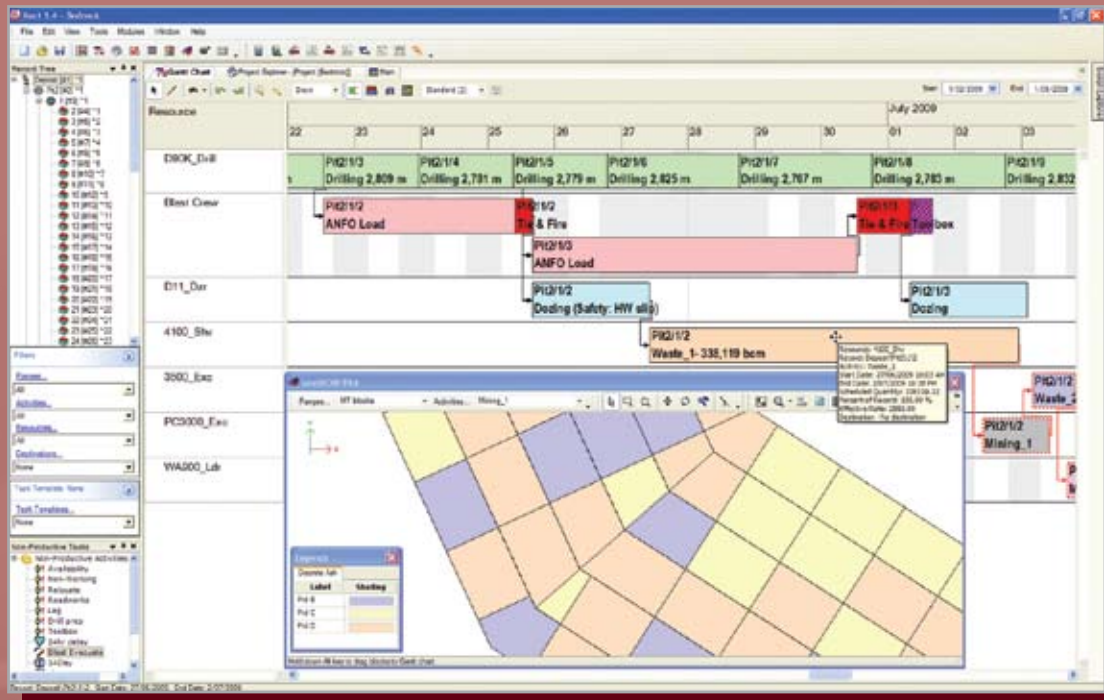

Users may construct, analyse and update short-term mining schedules on a regular basis using databases, Gantt charts, plots and reports.

Benefits

The key benefits of using Xact include:

- Xact provides the framework for a unified, systemised short-term scheduling process to be implemented
- Innovative software design and functionality addresses many of the limitations of spreadsheet based scheduling
- Schedule construction and analysis via 'drag & drop' interactive Gantt charts and reporting tools provide an ideal environment in which to rapidly update and assess short-term schedules
- Inevitable prioritisation issues between production and maintenance activities may be highlighted and analysed in Xact with rapid scenario analysis being available via the reporting tools
- Xact is continuing to evolve as a value-adding application for a range of mining and industrial applications and has a well-defined, client-driven development strategy.

About Runge

Runge Limited (Runge) is a leader in the provision of technology products, consulting services, and training courses to the global mining industry, delivering solutions and services across a range of commodities.

With expertise across a range of mining disciplines, our approach to the *business of mining* is strongly grounded in economic principles and delivering mine planning solutions that are tightly coupled with our technological support and training. Through these solutions, mining professionals gain access to technology and knowledge that allows them to optimise their business planning process. We provide expertise from corporate advisory and strategic planning through due diligence and related financial services to resource and reserves management.

Runge currently owns and operates 18 offices in 10 countries throughout the world. Our team includes Pincock Allen & Holt, Minarco-MineConsult, MRM Mining Services Pty Ltd and GeoGAS.

Runge provides people and technologies from across our global offices. We have integrated processes which ensure consistency of quality deliverables for our customers around the world. For any given project we enlist the best combination of technology and people to suit the location, commodity, scope and specialist skill requirements.
