For over 18 years, Runge has been providing advanced career development courses to the Mining Industry worldwide.

Our courses are recognised as unique in the industry. The knowledge and challenges that Runge consultants deal with daily in project work and software implementations is captured and reflected in our high quality training courses. Runge's courses cover mine business planning and fall into the following major categories:

- Integrated Open Pit Design
- Dragline Mining Systems
- Truck and Loader Mining Systems
- Mining Economics
- Mining for Non Miners

MRM/Runge can work with you to meet your training requirements. Please contact our Training Department.

MRM/Runge have redeveloped our industry recognised **Mining for Non Miners** training course.

This highly regarded course has evolved in response to the demand from non-core technical professionals with a need to gain a greater understanding of the overall mining industry. The information gained during the course will allow those professionals associated with the mining industry to understand the jargon, technical skills, and mining concepts involved in mine operations. The outcome is more effective and efficient interaction with core mining staff, a greater understanding of the overall operation of a mine and where each job function fits into the overall process.

The course materials and extensive notes have already proven successful when used with audiences as diverse as:

- Pacific Island Land Owners;
- Accountants;
- Mine Foremen;
- Government departments; and
- Senior Executives.

This course covered topics such as:

- Mining Terminology
- Mining Methods
- Mine Design
- Rehabilitation and Environment
- Drilling and Blasting
- Truck and Shovel Operations
- Pit Services & Safety
- Dragline Operations

- Statistics and Reports
- Mine Services & Admin.
- Geotechnical Issues
- Reserves
- Mine Costing

MRM/Runge prides itself on our ability to tailor our products to your specific needs, so that the exact content of a particular course can vary to meet the objectives of participants. Mining for Non-Miners can also be held on site to more precisely match the requirements of a specific mining operation.

The course contains a series of practical, hands-on workshops to consolidate the information gained and to build useful skills. Through the interactive workshops participants will learn how to:

- Read and interpret mine design
- Understand pit optimisation and computer simulations.

Examples, case studies and multi-media presentations are drawn from MRM/Runge's direct involvement in studies worldwide.

WHO SHOULD ATTEND

The course provides an overview and background to the mining industry. Professionals who are new to mining will benefit from this course as well as any others who have contact with the mining industry. We typically present this course to; Administration staff, Accountants, Finance staff, Mine operations staff, Engineers new to the mining industry, Senior executives, Legal staff, IT staff and HR staff.

What previous attendees have said about the Mining for Non-Miners course:

"Good / Valuable day – very worthwhile course – keep running it for future generations of non-miners"

M.R., Application Delivery Manager.

"I enjoyed the course and it has raised my interest in the mining industry"

L.H., Support Engineer.

"Overall was Excellent. All material was very interesting and mining ops material was very useful"

K.G., Engineering Manager.

"Very enjoyable – learnt a lot regarding mining which all people who work in the mining industry should know i.e. overall processes & basic definitions. Thanks."

T.W., Graduate Accountant.

"I found this course to be very informative, explaining the start to finish process of a mine. Even though I have been in the industry for 5 years & having spent time in many different mine sites, there was a lot of very interesting things that I learnt from this course. (The presenter) explained things very clearly and is very approachable"

F.S., Site Clerk.

"It was really helpful to get an insight into processes of mining, as this will help me better understand reports that I deal with"

K.S., Assessor.
